

IONIC

What holds the bond together?

Types of atoms in bond:

Show a particle view illustration of an ionic solid:

Formula and name of examples:

Properties of solids:

METALLIC

What holds the bond together?

Types of atoms in bond:

Show a particle view illustration of a metallic solid:

Formula and name of examples:

Properties of solid:

COVALENT

What holds the bond together?

Types of atoms in bond:

Show a particle view illustration of a molecular solid:

Formula and name of examples:

Properties of solid:
